

Hubert Gbate

I am Hubert Gbate, 24 years old. I am the first child of my parents. I had my Senior High school education at Mawuli School. I proceeded to Kwame Nkrumah University of Science and Technology (KNUST) School of medical sciences where I studied medicine for six years.

I was fortunate to be selected as part of Educational Pathways International (EPI) beneficiaries during my years of study in the medical school. I received full scholarship for my six years medical education at the university. I look forward to the challenge of working as a medical practitioner.

I intend to put in my best, and help contribute my quota to improve the lives and well-being of people wherever I find myself. I believe with hard work and dedication, anything is achievable. I plan to further my studies but at the moment I haven't decided my field of specialisation yet, though I am interested in genetics and research, a bright prospect of preventing and treating disease.

I am grateful to EPI for their contribution and helping me achieve my goal and dream of becoming a Medical Practitioner. And I intend to do my best to contribute to the society and change the world for the better!
