

Kwabena Agyei Sasu-Boakye

My name is Kwabena Agyei Sasu-Boakye, a beneficiary of Educational Pathways International (EPI) scholarship. I recently graduated from Kwame Nkrumah University of Science and Technology (KNUST). I studied BSc. Electrical/Electronic Engineering.

Words cannot express how privileged I am to be a recipient of the Educational Pathways International (EPI) scholarship. My first year in KNUST was far from comfortable as I had to adapt to a new life and environment away from home with the little I had. I was happy when I saw the scholarship advertisements on the school's website. I applied and became a beneficiary in my second year. EPI offered me full scholarship that covered all my university expenses. It was a relief knowing that a huge burden has been taken off my shoulders as well as my family. This allowed me to focus on my books and work towards attaining excellent grades. EPI has helped me with a good foundation.

I would like to further my studies and obtain a master's degree and possibly a doctorate degree. The knowledge acquired in my studies will be essential in my aspirations to help solve some of the energy issues my country faces. The energy sector needs major improvement; research innovations which will drastically improve the sustainability of energy production and consumption. The world needs creative and innovative engineers and I plan to be one. I aspire to be partaker in researches to find ways of producing clean and affordable energy. In a quest to impact the next generation, I plan to go into academia in future.
