

Michael Agyeman Obeng

I am Michael Agyemang Obeng, a beneficiary of Educational Pathway International (EPI) scholarship. I read BSc Medical Laboratory Technology at Kwame Nkrumah University of Science and Technology (KNUST). Not only did EPI supported me financially but also I received enormous benefits from the seminars, internships, and mentorship programs which were possible because of EPI. In fact, I have personally benefited more than I anticipated. As a matter of fact, there is an impressive difference in the benefits one gets from EPI which cannot be gotten from other charitable Organisations in education.

Furthermore, our meetings usually organized by the local Coordinator are tailored to address the needs of the students and have had great impact on me. Despite the challenging nature of my program of studies, EPI made it possible for me to have a successful journey through my university education.

It is my confident desire to bring my professional knowledge and skills to alleviate the pain and distress of sick people in my community, my country and the world at large.
