

Wilson Tordzro

When the path I chose seems blurred, Educational Pathways International (EPI) paved the way for me and put me on the path, encouraged me to put my best foot forward and strive for excellence. EPI helped me realize that every cloud indeed has a silver lining.

I joined this wonderful family in my penultimate year of university and ever since have had the peace of mind to pursue my academic work and develop myself in other areas of life.

I graduated from Kwame Nkrumah University of Science and Technology (KNUST) with a Bachelor of Science Degree in Business Administration (Accounting option). I also received an award of excellence from The Beige Foundation under their Youth Excellence League (YEL) as one of the best graduating students. The counselling, guidance, teachings and support given me by EPI was indispensable in helping me become a better person with an improved world view.

As an upcoming Entrepreneur and a Chartered Accountant is my desire and goal to help others in my community and nation to become who they want to be and utilize their potential. I am prepared to give the country and the world the best of what I have become.
