

DIVINE AHIAGAH

I am Divine Ahiagah. I studied at Kwame Nkrumah University of Science and Technology (KNUST) which is located in Kumasi, Ghana. I am pursuing a Bachelor of Science degree in Agricultural Biotechnology.

I joined Educational Pathways International (EPI) in November, 2018 and I can say my life took a turn around when I was given the opportunity to be a part of this great family. I met a lot of people who were already on the programme and they have impacted my life positively. They were always available to give good advice to keep me going both in academics and in my social life. Since I joined EPI, I developed the zeal to work extra hard to achieve my academic goals and I was fulfilled with EPI on my side.

I have always dreamt of becoming a Research Scientist in plant genetics and molecular biology which informed my decision to read Agricultural Biotechnology at this level of my education. I hope to impact my nation, Ghana, positively with the knowledge I will acquire in my field of study.

In conclusion, I would say I am very delighted to be a part of this scholarship scheme and I'm very grateful to EPI for availing themselves to touch lives like myself and others who have been given the same opportunity. I know their labour in this good work of theirs would not be in vain.
