

EBENEZER OKO ARTHUR

I studied BSc. Civil Engineering at Kwame Nkrumah University of Science and Technology (KNUST), Kumasi, Ghana and am a beneficiary of the Educational Pathways International (EPI) Scholarship Scheme. My name is Ebenezer Oko Arthur.

Educational Pathways International (EPI) intervened in my situation in the 2nd year of my education. Not only did they completely take over my family's financial responsibilities but also represented my family in their duties in and out school.

EPI has developed all aspects of my life both on campus and after school. I have been part of this family and it has helped improve my social wellbeing. I have had the chance of being steered how to realize my ambitions. I can positively brag of the intermittent seminars organized to nurture us into individuals who will be the next generation of problem solvers. I have

been able to go through my undergraduate programme more easily because I had more time to focus on my academics and other aspect of my life.

Moreover, I have learnt about giving back to society regardless of how insignificant the help may be. Vacation internships I enrolled in made me understand that I do not have to be powerful before I can effect a change or solve public problems and have an impact on others in my society and beyond. This is an experience that will make me continue to think and care about society in the future.

My hope of being an Environmental Engineer is almost recognized and I am ever ready to give tremendously back to my country and society.

Educational Pathways International is not just an organization, it is a family and I am proud to be part of it.
