

MABEL AMPOFOWAA YEBOAH

Mabel Ampofoa Yeboah is my name. I offered Doctor of Pharmacy at Kwame Nkrumah University of Science and Technology (KNUST), Ghana.

I have been on the Educational Pathways International (EPI) scholarship programme for five years and I would say it has been a greater blessing geared towards assisting me financially throughout my stay on campus. Educational Pathways International (EPI) awarded me a comprehensive scholarship for my university education. This brought greater joy and created a good learning environment for my stay on campus. It also went the extra mile of helping my family as it has reduced the financial burden on them.

EPI also has helped me in improving my grades. As a beneficiary on the Educational Pathways International (EPI) Program, I was motivated and empowered to work harder to improve my academic results. In order to continue being under the scholarship program and enjoying its benefits, I pushed myself to be the best I could be and also to meet the recommended CWA (cumulative weighted average).

It also helped me to develop a good educational relationship with fellow students on the scholarship program and with whom I talked to about academic problems. This helped me a lot in acquiring new ideas to learning.

I chose to offer Doctor of Pharmacy because it has always been my desire since childhood to help and give back to the community. I thought the best way I could accomplish that was helping people with their health needs because as the saying goes 'health is wealth'. Pharmacists play a key role as members of the healthcare team because they are the medication specialists. I want to help people get well and I also like to work directly with patients. Pharmacy also provides a variety of career opportunities.

I plan on working in the hospital and doing locum in a community pharmacy for some few years so as to save some money to further my education. I would like to further my education to become a Clinical Pharmacist. It's my long-term goal to give back to my community and country, Ghana. I would like to assist less privileged and brilliant students in my community to help them accomplish their dreams and aspirations.

I would like to take this opportunity to thank Educational Pathways International for giving me this great opportunity to be part of the EPI family. I appreciate the tremendous impact it has made in my life in getting me to where I am now. I promise to help others and make good use of all the support I have had from the Educational Pathways International (EPI) family. EPI has brought me a step closer to achieving my dreams.
