

## RICHARD ABEETINSO

My name is Richard Kandire Abeetinsso, an alum from the University for Development Studies (UDS), Ghana. I studied Bachelor of Commerce (Finance option).

Educational Pathways International (EPI) laid a pragmatic foundation for me in the realization of my dreams. EPI gave me the ethical, social and financial assistance without which I would not have been able to complete my university education.

With the objective of turning into a worldwide business pioneer and assisting people and organizations with explanations of unconventional business complexities, I studied Finance (an option in Commerce). My professional objective of becoming a Financial Accountant, being a worldwide business pioneer despite everything persuades me to accomplish higher heights in the realm of business.

EPI gave me a push, lifting me to the academic stool for further studies. I intend to study Business Administration alongside with professional courses in

Accounting. As a future Financial Accountant, accountability, financial discipline and rendering business solutions to businesses in Ghana and beyond remained my paramount goal. This will lead to development of the financial sector and the entire economy of Ghana as a whole, that, is my passion.

My genuine appreciation to the EPI family for getting me closer to my career goal.
