

JOSHUA KAFUI ASEMPA

My name is Joshua Kafui Asempa. I studied Medicine at the University of Ghana Medical School, Ghana. I've always been good in the sciences and hence decided to do medicine in the university. Why I chose medicine was because I have always admired Doctors, how they go about their work and all.

Studying medicine was a long journey that required dedication, determination, hard work, and money. After my first year in school, a friend introduced me to Educational Pathways International (EPI). I joined Educational Pathways International (EPI) in 2015. Before joining, I wondered how life would be without having a scholarship. Luckily

for me EPI came to my aid.

In the EPI family one is not only given the scholarship but we are being monitored and mentored throughout our stay in the school, making sure we are on track. This has been a major transformation for me since I am constantly being pushed to do more and get the best out of my life. I've also learnt many skills being part of the family.

I will work as a Doctor after my housemanship and I look forward to sharing the blessings I've received and impacting more lives.

I can confidently and sincerely say being part of the EPI family has been a blessing to me and my family. I will therefore want to take this opportunity to thank Educational Pathways International for the immense work they are doing, blessing lives and making dreams realities.
