

WISDOM KEWU

I attended Kwame Nkrumah University of Science and Technology (KNUST), Ghana. My name is Wisdom Kwame Kewu. I read BSc. Chemical Engineering as my first degree. I was enrolled on the Educational Pathways International (EPI) scholarship program in October 2017.

I am very glad to have been on the EPI scholarship. Ever since I joined EPI, my life has been transformed positively and tremendously. I am the first out of three siblings to be in the university. Due to the timely intervention of EPI, I

had a seamless academic experience which made it possible for me to achieve the “College of Engineering Excellence Students Awards” three consecutive times.

Upon substantially having a sound mind financially, I moved on to exploit the graphic designing software skills I learnt way back after I completed Senior High School. I have established a mini-business where I work on complex graphic design options for business firms. EPI has boosted my confidence level in the society. I now engage myself confidently in group meetings and discussions. I have learnt a lot of intangible things from the intermittent meetings/workshops that EPI organized for us.

I decided to read Chemical Engineering because of its versatility. In Chemical Engineering, one can divert to any area where there is production. Currently, I would like to move into the oil and gas sector in order to boost Ghana’s economy since oil and gas are a major contribution to the growth of the economy. It is in my best interest that, I would establish a firm that supports the less privileged in my community and most importantly set up businesses as well. In my community, most people are unemployed and uneducated due to lack of decent jobs and substantial finance respectively.

My heart-filled appreciation goes to EPI. Without EPI scholarship, I believe most of my goals would have gone down the drain. I am gradually on the path of achieving my dreams and aspirations in life. EPI is a family I will never regret being part of. I love EPI and it’s my earnest prayer that EPI grows and expand continuously to transform lives of many, especially in Africa.

Thank You!
