

## ROSEMOND DABO

I am Rosemond Dabo, a third year Nursing student in the University for Development Studies (UDS).

EPI has really impacted my life in diverse ways since I got the opportunity to be part of this family. The leadership skills we are taught, the need to take up roles in society, to know the right conduct and the numerous pieces of skills and training which are taught in our seminars and conferences has really shaped my life.

The Nursing programme I am currently offering, is a stepping-stone to the Anesthetist I have always dreamt of becoming. Once I obtain a BSc. degree in Nursing and a certified Registered Nurse license, I plan to

practice for a year and then pursue a master's degree in anesthesia to gain a certified registered nurse anesthetist license and be able to practice as an Anesthetist.

The pandemic that hit the entire world and caused us to stay home for about 10 months has not been easy but very educative and a time of learning new ideas. Within those periods, I helped my parents and learnt a bit of other concepts on my own. The online examination to complete the courses which we studied online was a great experience and for me was successful.

I am certain that my dreams and aspirations will become a reality because EPI gave me the opportunity.
