

## CONFIDENCE ANTWI

Confidence Antwi is my name, I read BSc. Computer Engineering at the Kwame Nkrumah University of Science and Technology (KNUST), Ghana. I graduated as a first class student, I have been part of the Educational Pathways International (EPI) Scholarship programme since 2017. The scholarship has been very instrumental in my university education and has impacted various aspects of my life.

The comprehensive financial support from EPI made my university education smooth and stress free and this helped me to focus mainly on my academic and career objectives and not to think about such expenses. The financial support has also

helped my mother to save some money to run her trade.

Through the annual luncheon events, through our career and leadership workshops, I have learnt valuable lessons and insights that are needed at the workplace and in life. Through the workshops, I have learnt and developed leadership skills, teamwork and entrepreneurial skills. I have also learnt how to write good reports and a winning curriculum vitae. Enjoyed both our monthly workshops and annual luncheon gave me the opportunity to meet and get to know other EPI scholars, socialize, make friends and also extend my network of professionals.

Being part of EPI made me to take my academics seriously and always strived to be the best, as a result, I always maintained a good academic performance and results every academic year. Pursuing Computer Engineering as a career path is very promising due to the plethora of job opportunities available in that field. In order to prepare me adequately to capitalize on the opportunities in the IT industry I chose to read Computer Engineering which is also in line with my career objectives.

It is my desire that after I have been firmly established in life, I will help establish an IT foundation that will equip individuals with knowledge and skills in computers and programming especially in the rural areas, this is because the future is all about digitization and people cannot be part of it without IT literacy.

With a heart filled with gratitude and joy, I say, thanks to Educational Pathways International.
