

MARYLYN ODURO AWUAH

My name is Marylyn Oduro Awuah. A graduate of BSc. Petrochemical Engineering at Kwame Nkrumah University of Science and Technology (KNUST), Kumasi, Ghana and a proud beneficiary of Educational Pathways International (EPI).

I am forever grateful to Educational Pathways International (EPI) for the immerse support all through my tertiary education. Fortunately for me, I was selected by Educational Pathways International (EPI) the same year I gained admission to study at the university and I am always thankful for that. I have received numerous support and benefits from this scholarship since I joined and have been positively impacted in my academics, leadership skills, family life, social life, among

others. The training I have received from EPI has shaped me for academic excellence, it has helped me achieve some of my career goals as well and I am prepared for the corporate world.

With the goal of helping to create an enabling environment through science and technology, it has been my passion to be an Engineer. I opted for Petrochemical Engineering because our fast-growing global world required variety of petrochemical products for a better and more comfortable environment. Some of such products include plastics, pharmaceutical products and medicine, paints and coatings, rubbers, synthetic fibers, polyvinylchloride (PVC), fertilizers, pesticides, detergents, dyes, clothing, cosmetics, liquefied Petroleum gas (LPG) and other petroleum derived product which are of great importance to our wellbeing and comfort.

Thank you Educational Pathways International (EPI). Ayeko!
