

SYLVESTER AGYAPONG

My name is Sylvester Agyapong. I studied Computer Engineering at the Kwame Nkrumah University of Science and Technology (KNUST), Kumasi, Ghana. My dream since I was a child is to become a great technology entrepreneur like Bill Gates, Elon Musk, Mark Zuckerberg and others that is what guided me to pursue Computer Engineering. Achieving this dream means I had to stay in school and stick to my books.

That became difficult since I had to take part-time jobs in order to be able to pay my academic fees. Then in my second year, I met Educational Pathways International (EPI). I enjoyed a comprehensive scholarship from EPI. Also the EPI, being a community of

intellectuals, offered motivation and empowerment for me to keep on working to make my dreams come true. Educational Pathways International has offered not just sponsorship but a reason to work hard day and night on my dream.

Upon graduation from the university and rendering my national service, I intend to start up a software and AI company with others who share the same dream as myself. Together, we will work to push our country into the new age of technology and in the process raise the economy of our country to greater standards for the benefit of all citizens.

Thank you EPI for your support and guidance.
