

# ALHASSAN ABDUL-MAJEED

My name is Alhassan Abdul-Majeed and I am a graduate of Agricultural Engineering at the University for Development Studies. Thanks to Educational Pathways International (EPI) scholarship programme, I was able to pursue my academic goals and achieve my dream of obtaining a degree in Agricultural Engineering.

Since joining the EPI scholarship programme, my life has been positively impacted and molded. The scholarship did not only provide financial support but also helped me develop essential skills. These skills have been instrumental in my academic pursuits and will continue to be valuable in my future career.

I chose to study Agricultural Engineering because I am passionate about finding innovative solutions

to improve the efficiency and productivity of farming practices in Ghana. I believe that my education in this field will enable me to contribute towards the development of sustainable and profitable agricultural systems in Ghana.

My future goals include pursuing master's and PhD degrees in Agricultural Engineering and establishing my own commercial farm. I also aim to mentor and inspire young people in my community to pursue careers in agriculture.

I am grateful to Educational Pathways International for providing me with the financial support and resources needed to pursue my academic and career goals. I am committed to giving back to my community and contributing towards the growth and development of agriculture in Ghana.
