

## FREDERICK DOGOBLI

My name is Dogoli Fredrick, I am a graduate from the University for Development Studies, Tamale, Ghana, with a degree in BSc. Health Information Management. Since joining the Educational Pathways International (EPI) Scholarship Programme, I have experienced a transformative shift in both my academic journey and personal development.

Before receiving the EPI Scholarship, financial challenges threatened my ability to continue my education, and I faced the real possibility of dropping out of university. Coming from a family of five siblings and losing both parents at a young age, my senior sister, the family's breadwinner, struggled to support me. However, the EPI Scholarship relieved me of this financial burden and offered additional support

through mentorship programs and the development of soft skills, particularly in communication and leadership. My confidence in public speaking has significantly improved, and my academic performance steadily rose, which paved the way for me to excel in my studies.

I chose to pursue Health Information Management because of my passion for healthcare and the growing importance of data management in improving patient outcomes. I am driven by the potential to enhance the quality of patient care through accurate data collection, analysis, and informed decision-making. With advancements in technology transforming healthcare delivery, I believe this field offers immense opportunities for growth and impact.

My career goal is to become a dedicated Health Information Officer, proficient in healthcare data management, and to contribute to improving the quality and efficiency of healthcare services in Ghana. In the long term, I aim to utilize my skills and knowledge to improve healthcare delivery, enhance patient safety, and advocate for better health information systems across the country.

Beyond my professional aspirations, I am committed to giving back to my community and Ghana. I intend to leverage my education to help develop efficient data management systems in rural areas, ensuring that even the most underserved communities have access to quality healthcare services.

I am deeply grateful to the Educational Pathways International Scholarship for making my academic journey possible and for shaping my path toward a brighter future. The support I have received from EPI has been invaluable in helping me pursue my dreams and empowering me to make a meaningful contribution to my country's development.
