

## PROSPER A. ATUASE

### **Prosper Abewini Atuase**

**Programme:** BSc. Chemical Engineering

**University:** Kwame Nkrumah University of Science and Technology, Ghana

**Class:** First Class Honours

Educational Pathways International (EPI) gave me more than just a scholarship. It permitted me to dream, and the courage to believe that those dreams were valid. As a student of Chemical Engineering at Kwame Nkrumah University of Science and Technology (KNUST), Ghana, the financial demands of pursuing higher education were overwhelming. EPI not only relieved that burden by covering tuition, hostel, books and living expenses. It was a comprehensive

scholarship. Through its mentorship sessions on leadership, financial literacy, time management, and personal development, EPI shaped me into a more balanced, self-aware, and focused individual.

Before EPI, much of my energy was consumed by financial anxiety. After joining the scholarship programme, I was able to fully dedicate myself to academic excellence. This support created the mental clarity I needed to graduate with First Class Honours. More importantly, it helped me grow holistically, not just as a student, but as a young leader and thinker.

My decision to pursue Chemical Engineering stemmed from a deep curiosity about how materials and energy systems can be reimaged for sustainability. This interest evolved into a passion for renewable energy and materials science. Ghana has committed to achieving net-zero carbon emissions by 2060—a bold but necessary goal. I am committed to being part of the solution. With the strong academic foundation, I have received, I intend to pursue graduate studies focusing on electrochemical energy systems such as batteries and fuel cells. In the long term, I aspire to establish a consultancy firm that will guide Ghanaian policymakers and industries in implementing clean energy solutions effectively.

I am deeply grateful to EPI for believing in my potential and investing their resources, mentorship, and trust in me. They gave me the wings to soar, and I carry that responsibility with pride and purpose. EPI didn't just support my education—it moulded my vision. It dared me to dream, and I intend to make those dreams count—not just for myself, but for my community and Ghana.
